Profile

Computer Science student with a strong foundation in backend development, database design and management, and full-stack web development. Experienced in working with databases, networking, business process modeling, and system-oriented problem solving, with an ability to approach technical tasks from both development and business perspectives. A detail-oriented and adaptable learner who is eager to contribute to a professional team, take on new challenges, and apply technical knowledge to real-world projects.

Tech Stack

Languages:	C, JavaScript, Java, Python
Frontend:	Next.js, React, TypeScript, Tailwind CSS
Backend:	Node.js, Express.js, Supabase
Database:	MySQL, SQL, Database Design & Modeling
DevOps & Tools:	Vercel, GitHub, Git
AI Models:	OpenAI (GPT), Anthropic (Claude), Google Gemini

Projects

Explain My Bills! - July 2025

Vite | React | Tailwind | Python | Google Gemini

Full Stack Developer

AI-powered Multimodal Bill Summarization Web Application for Users

- Developed a full-stack AI-powered bill intelligence platform that extracts, classifies, and analyzes uploaded bills using a multimodal LLM pipeline.
- Architected the database infrastructure and integrated Cloudinary to efficiently manage, store, and serve media assets across the application.
- Repository: <https://github.com/ShawnMayol/explain-my-bills> Live link: <https://explain-my-bills.vercel.app>

MindVault - May 2025

Java | PHP | MySQL

Full Stack Developer

A productivity-driven note-taking application designed to optimize student study sessions by seamlessly combining rich text notes, custom flashcards, and time management tools.

- Engineered and integrated a custom Pomodoro timer directly into the workspace to facilitate structured, distraction-free study intervals.
- Collaborated on the database architecture to reliably store, manage, and retrieve user notes and personalized flashcard decks.
- Helped develop clean, responsive UI components for the study tools to ensure an intuitive and accessible user experience.
- Repository: <https://github.com/Alias314/mindvault>

POS and Management System for Julie's Bakeshop - July 2024

CSS | PHP | JavaScript | MySQL

Full Stack Developer

A Point of Sale (POS) and operations management system tailored for Julie's Bakeshop, focused on robust data handling, inventory tracking, and streamlined store management.

- Designed and engineered the core database architecture to ensure accurate, optimized storage for critical business and daily sales data.

- Developed integrated full-stack features, connecting the PHP backend with the JavaScript and CSS frontend to facilitate seamless user interactions.
- Collaborated on end-to-end implementation to deliver a functional, data-driven solution tailored specifically for information management.
- Repository: <https://github.com/Nil-AI/POS-and-Management-System-For-Julie-s-Bakery>

Soft Skills and Strengths

- Collaboration & Communication
- Self-Supported Learning
- Growth Mindset
- Adaptable to Evolving Environments

Certifications & Achievements

<i>Junior Cybersecurity Analyst Career Path</i> CISCO	Dec 2025
<i>Associate Data Analyst</i> DataCamp	May 2024

Education

University of San Carlos	Aug 2023-Present
Bachelor of Science in Computer Science
